

A Comprehensive Alphabetized Table of Contents Burke County Genealogical Society Journal 1983-2014

By Margaret C. Richards

The Burke County Genealogical Society Journal, published quarterly, is a venue for the publishing and sharing of historical documents members have transcribed. Many of these are abstracts of land grants, road records, court records, tax lists, family histories, old obituaries, interesting newspaper articles from the past, and other items of a genealogical nature. Some of the original documents can only be found at the North Carolina State Archives and are not available online. This makes the BCGS Journal a valuable resource.

A complete set is available in the North Carolina Room of the Morganton Library along with an index for some of the earlier journals. Although a complete indexing of names for all journals is a major goal, it has not been completed at this time. Therefore, a comprehensive alphabetized table of contents has been created to aid researchers. Some of the titles have been adjusted or modified to add clarification, consistency, and sorting options. Last names first have been added before articles if the article contains information primarily about that person or family. Many obituaries and marriages taken from old newspapers have been listed separately. However, the Journal article must be accessed to see which newspaper. Other entries not related to genealogical or historical research have been omitted.

The complete Table of Contents has been posted on the Burke County Gen Web page at www.ncgenweb.us/burke/ and in the NC Room of the Library. Copies of "most" journals are available for purchase through the Burke County Genealogical Society, P. O. Box 661, Morganton, NC 28680. The following is a simplified chart for determining prices in 2015: 1@ \$4; 2@ \$7; 3@ \$9; and 4@ \$12 which includes taxes if applicable and shipping. For more than 4, simply combine these prices for the total number you wish to order. Please contact the society to check availability and prices of particular issues.
