

# The Digital Workflow

or

## *Okay, I Bought A Digital Camera... Now What?!*

This is a ten week course on how to get started in digital photography. The intent is to give you a thorough introduction to the tools and techniques of the medium. It is through the mastery of these tools and techniques that you are able to discover the art of photography for yourself. Not through simple serendipity, but with confidence and intent.

### Class topics include:

- Answer the Basic Questions
- Photo Management
- Cropping & Resizing
- Color Correction
- Solving Image Problems
- Image Restoration
- Masking & Special Effects
- Sharing the Joy

The class instructor, Ari Miller, is a local photographer featured in the Lincoln Cultural Center Gallery as well as a permanent installation in the First Charter Main Branch.

He operates Perception Arts, a graphic design and photography company. He has enjoyed recognition through national publication, photo competitions and pieces displayed in locations nationwide.
